WCP Highlights

Production of bituminous coal and lignite in the week ended July 30, 1983, as estimated by the Energy Information Administration, was 15,767,000 short tons. This was an increase of 1,354,000 short tons, or 9.4 percent from production in the previous week. Production in the corresponding week of 1982 was 15,960,000 short tons. Bituminous coal and lignite production from January 1 through July 30, 1983 totaled 427,539,000 short tons, 13.4 percent below production in the same period of 1982.

Production of Pennsylvania anthracite in the week ended July 30, 1983 as estimated by the Energy Information Administration, was 110,000 short tons, an increase of 21,000 short tons or 23.6 percent from production in the previous week. Production in the corresponding week of 1982 was 90,000 short tons. Anthracite production from January 1 through July 30, 1983 totaled 2,467,000 short tons, 14.8 percent below production in the same period of 1982.

IMPORTANT NOTICE

As required by Government regulation, EIA is conducting its annual publications mailing list review. If you are on the EIA mailing list, we will soon be sending you an important postcard. You will have to return it to us to stay on the EIA mailing list. If you have not received the postcard by JULY 20, 1983, please contact the National Energy Information Center at 202-252-8800.

NOTE: This notice does not apply to subscriptions which have been purchased from the Government Printing Office (GPO).

* = For detailed data, the absolute value of the number is less than 0.5. For percentage calculations, the absolute value of the number is less than 0.05 percent.

NM = Percent difference calculation not meaningful.

Notes: Totals may not equal sum of components because of independent rounding. Percent difference is calculated on year-to-date totals before rounding. Coal includes anthracite, bituminous, subbituminous, and lignite.

^aExcludes coke plants.

W = Withheld to avoid disclosure of individual company data.

Note: The data presented here are the only data reported directly by respondents on Form EIA-3,

EIA estimates that these data cover approximately 97 percent of all the coal consumed by manufacturing plants in the United States during 1982.

Source: Energy Information Administration, U.S. Department of Energy, Form EIA-3, "Quarterly Coal Consumption Report — Manufacturing Plants."
